

Donor Families
AUSTRALIA

**Someone* is missing
from our network.**

***is it you?**

A life that touches others goes on forever

Donor Families Australia is a nationwide independent support and advocacy network comprising families who have donated their loved ones' organs and tissue.

We AIM to:

Care and support families who have donated their loved ones' organs and tissue.

Advocate in all aspects of organ and tissue donation and give donor families a voice.

Educate the wider community about the benefits of organ and tissue donation whilst emphasising the very important role of Donor Families in this process.

Share the experiences with similar people to support those making life-changing decisions.
